

Wishbone Rear Suspension System

**for 1999-2006
GM Pickups**

FEATURES and BENEFITS

- Includes patent pending R-Joint rod ends to eliminate binding and noise.
- Compatible with Coilovers and ShockWaves. Air or static drop, it's your choice.
- Bolt-on C-Notch reinforces OEM frame rails and feature integrated suspension mounts.
- Wishbone upper link replaces the OE panhard bar for ZERO lateral movement during suspension travel allowing for extremely tight wheel/tire fitment.
- Optimized anti-squat, instant-center and pinion angle-migration for improved ride quality and handling performance.
- Designed for simple installation with minimal OEM rivet removal.

**NEW
3-Link Design!**

RideTech's new delrin-lined, stainless steel R-joints offer high articulation, long wear resistance without binding or noise.
